KACEY DAY (ANDERSON)

EDUCATIONAL PROGRAM + PRODUCT DESIGNER | LEARNING EXPERIENCE DESIGNER

Fort Worth, TX | (714) 225-5659 | KaceyNAnderson@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Educational program and learning experience designer with experience spanning competency-based education, faculty readiness, digital product development, individualized academic programming, and instructional design. Translate complex learner, stakeholder, program, and business needs into clear, evidence-informed experiences, tools, pathways, and scalable systems. Bring a practitioner perspective grounded in direct learner support, standards-aligned education, cross-functional implementation, and iterative design.

CORE CAPABILITIES

Program & Learning Design: Competency-Based Education · Backward Design · Learning Architecture · Assessment Design · Faculty Readiness · Differentiated Pathways

Product & Experience Design: User Workflows · Information Architecture · Interaction Design · Prototyping · Visual Communication · Learner Experience

Research & Strategy: Needs Analysis · Standards Alignment · Evidence-Based Decision Making · Success Metrics · Competitive Research · User Feedback

Implementation & Scale: Cross-Functional Collaboration · Quality Assurance · Change & Adoption · Design Systems · Program Launch · Continuous Improvement

PROFESSIONAL EXPERIENCE

WESTERN GOVERNORS UNIVERSITY

Senior Program Mentor, School of Technology | November 2023–Present

- Lead the Training Pod's design and development of faculty-readiness experiences for new academic program launches, translating complex program requirements into structured learning experiences, practical resources, and scalable implementation support.
- Develop reusable program-readiness frameworks and design standards, including learning blueprints, source-verification processes, accessibility and visual-design guidance, knowledge checks, QA expectations, and publication workflows.
- Co-lead FLIGHT, a cross-functional student-success initiative connecting students, mentors, instructors, and support resources through structured goal setting, study planning, progress monitoring, and targeted intervention.
- Guide FLIGHT through prototype, pilot, implementation, and adoption by incorporating stakeholder feedback, student input, testing, training, and change-management strategies to refine the experience and support scale.
- Partner across academic, learning experience, quality assurance, program-launch, and digital-experience teams to define scope, resolve dependencies, validate content, coordinate review, and move solutions from concept through implementation.
- Design, test, and facilitate professional-development experiences that move teams from asynchronous learning into practical application, including adult learning, user experience design, and Universal Design for Learning.
- Support learners across WGU's competency-based School of Technology through individualized academic planning, course sequencing, progress monitoring, and targeted intervention while extending impact through peer coaching, onboarding, and reusable mentor-development resources.

KACEY ANDERSON LLC

Founder, Learning & Product Designer | May 2022–Present

- Lead learning and product design across an independent education practice, creating learner-facing experiences, digital tools, instructional resources, assessments, and scalable support systems.
- Designed and developed Lumavi, a multi-role educational platform supporting administrators, tutors, learners, and families through role-based workflows, progress visibility, study planning, session documentation, communication, and service management.
- Translate learner, client, and stakeholder needs into learning pathways, user workflows, information architecture, structured resources, and digital experiences that simplify complex academic and support processes.
- Design personalized learning experiences, coaching frameworks, assessments, study plans, and performance-support resources using learner goals, performance data, and identified needs.
- Use assessment results, progress data, learner feedback, and ongoing observation to identify barriers, evaluate effectiveness, and iteratively refine learning and product experiences.
- Apply instructional design, adult learning, accessibility, behavior-change, and assessment principles to create clear, engaging, and measurable experiences.
- Research learning technologies, assessment methodologies, competitive products, and emerging educational practices to inform design decisions and new solutions.

PROFESSIONAL EXPERIENCE — CONTINUED

PEAK LEARNING SOLUTIONS

Academic & Test Preparation Coach | July 2023–Present

- Design individualized academic and test-preparation plans for middle school, high school, and college-bound learners using performance data, learner goals, skill gaps, and assessment timelines.
- Deliver targeted learning experiences across ACT, SAT, executive functioning, study strategy, and academic skill development, adapting instruction and resources based on learner needs and demonstrated mastery.
- Analyze diagnostic and practice-assessment data to identify performance patterns, prioritize skill gaps, measure progress, and continuously refine learning strategies.
- Develop customized instructional materials, practice activities, study frameworks, and performance-support resources that translate complex concepts into clear, actionable learning experiences.
- Align test-preparation experiences to ACT and SAT content domains and assessment expectations while applying evidence-based instructional strategies.
- Partner with learners and families to establish measurable goals, communicate progress, evaluate effectiveness, and adjust learning plans to support independence and sustained academic growth.

ALVARADO ISD | Alvarado, TX

English I & Yearbook Teacher | August 2022–June 2023

- Designed and delivered standards-aligned English I learning experiences, translating curriculum standards and course objectives into instruction, assessments, learning activities, and measurable outcomes.
- Used formative and summative assessment data to identify learning gaps, monitor progress, and adjust instruction based on demonstrated learner needs.
- Designed differentiated instruction, learning resources, and supports for varied academic needs while maintaining consistent expectations and outcomes.
- Integrated educational technology, evidence-based instructional practices, and social-emotional learning strategies to strengthen engagement, accessibility, and academic growth.
- Collaborated with educators, administrators, and families to identify learner needs, coordinate support, and adjust instructional approaches based on student progress.
- Led the district's UIL Journalism program, designing preparation experiences and coaching students in competitive writing and journalism skills.

NEWPORT HEALTHCARE | Costa Mesa, CA

Academic Coordinator | November 2019–August 2022

- Designed and coordinated individualized academic pathways for adolescents in grades 7–12, aligning school requirements, learner goals, accommodations, course progress, and individual needs to maintain educational continuity during residential treatment.
- Managed academic programming across multiple subjects and school contexts, using student performance, engagement, and completion data to identify barriers, adjust support strategies, and prioritize interventions.
- Partnered with families, educators, school teams, and treatment professionals to coordinate academic plans, resolve competing needs, and maintain continuity between students' home schools and residential programming.
- Supported students with IEPs, 504 Plans, accommodations, and other individualized learning needs by translating documented requirements into practical academic supports and instructional adjustments.
- Designed transition plans for students returning to school or progressing toward higher education, integrating course planning, organization, study strategies, academic preparation, and longer-term goals.
- Created structured yet flexible learning environments that balanced academic expectations, individual learner needs, treatment schedules, and changing circumstances while supporting continued academic progress.

SELECTED DESIGN WORK

FLIGHT | Enterprise Educational Systems Design — Created the original FLIGHT student experience and core Planner framework, then helped lead its evolution into a cross-functional student-success initiative spanning learner planning, progress monitoring, academic intervention, faculty support, and implementation systems.

Program Readiness | Educational Program Design + Faculty Enablement — Lead development of reusable faculty-readiness experiences and frameworks for new academic program launches, connecting program requirements, learner context, learning architecture, quality standards, stakeholder review, and implementation.

Lumavi | Digital Product + Learner Experience Design — Designed and developed a multi-role educational platform supporting administrators, tutors, learners, and families through role-based experiences, user workflows, progress visibility, study planning, communication, and service management.

EDUCATION

Master of Science, Management & Leadership | Western Governors University | 2024

Master of Science, Education & Curriculum Development | California State University, Fullerton | 2018

Graduate research: Cultivating Wellness Through Mindfulness Within Social and Emotional Learning — translated research and CASEL-aligned competencies into a differentiated teacher implementation resource.

Bachelor of Science, Child & Adolescent Development | California State University, Fullerton | 2016
